# After (nearly) 30 Years what I've learnt

**Clever Data Science doesn't fix terrible data / experimental design.**

**OTOH, Thinking Computationally can be Transformative**

**....and is *way* too important to be left to Computer Scientists**

**“People are a problem.”** *(Douglas Adams, The Restaurant at the End of The Universe)*

**Many of the problems in research are fundamentally Social.**

**Because I was good at  
Maths....**
