

**Top 10 FAIR  
Data and  
Software Things**

**Single PDF uploaded to Zenodo**

**No search - Use Case 1**

**Metadata?**

**Use case 2 - need to reload with metadata**

**API to search metadata?**

# Thoughts/Questions

- Overall - do we agree with the Use Case diagrams?
- Use case 1 - need layer for search (Yann Th/Fri)
- Using search - didn't get direct hits
- Need search which removes stop words etc.
- What are we missing here?
- PDF example good case in hand.
